CORRECTION TO POTENTIAL INCIDENTS OF CONCERN (PICs)/POTENTIAL AREAS OF CONCERN (PACs) SUBMITTAL NMH-412-93 FOR OPERABLE UNITS 8 AND 13 - NMH-513-93

The above-referenced letter incorrectly stated that Operable Units (OUs) 8 and 13 had incorporated Potential Incidents of Concern (PICs) and Potential Areas of Concern (PACs) into their Field Sampling Plans (FSPs) as part of their Phase I RCRA [Resource Conservation and Recovery Act] Facilities Investigation/Remedial Investigation (RFI/RI) Work Plans. Also, the letter incorrectly referenced that Technical Memoranda to include PICs/PACs for OUs 8 and 13 would not be developed.

The correct status of OUs 8 and 13 is that PICs/PACs were only identified in the FSP as far as location of the PICs/PACs areas were concerned. Specific sampling plans to address potential contamination in these areas are to be addressed through Technical Memoranda to the Phase I RFI/RI Work Plans.

The development of the Technical Memoranda for the PICs/PACs sampling plans in OUs 8 and 13 will initially be part of the Integrated Field Sampling Plan for the Industrial Area (IA) OUs - 8, 9, 10, 12, 13, and 14. The Integrated Field Sampling Plan will serve as the starting point for recommendations of sampling plans for PICs/PACs identified in OU 8 and OU 13. Additionally, the Industrial Area Field Sampling Plan for Surface Water and Sediments that is being prepared under OU 12 will also include recommendations on how to handle PICs/PACs for all the IA OUs.

EG&G Rocky Flats, Inc. will make every effort to include PICs/PACs as part of the existing Field Sampling Plans for all the IA OUs. If the inclusion of PICs/PACs requires significant changes to existing plans for FY94, changes will be recommended to the Department of Energy, Rocky Flats Office, and if applicable, additional funding may be required.
